

The Third Task: Save and Download

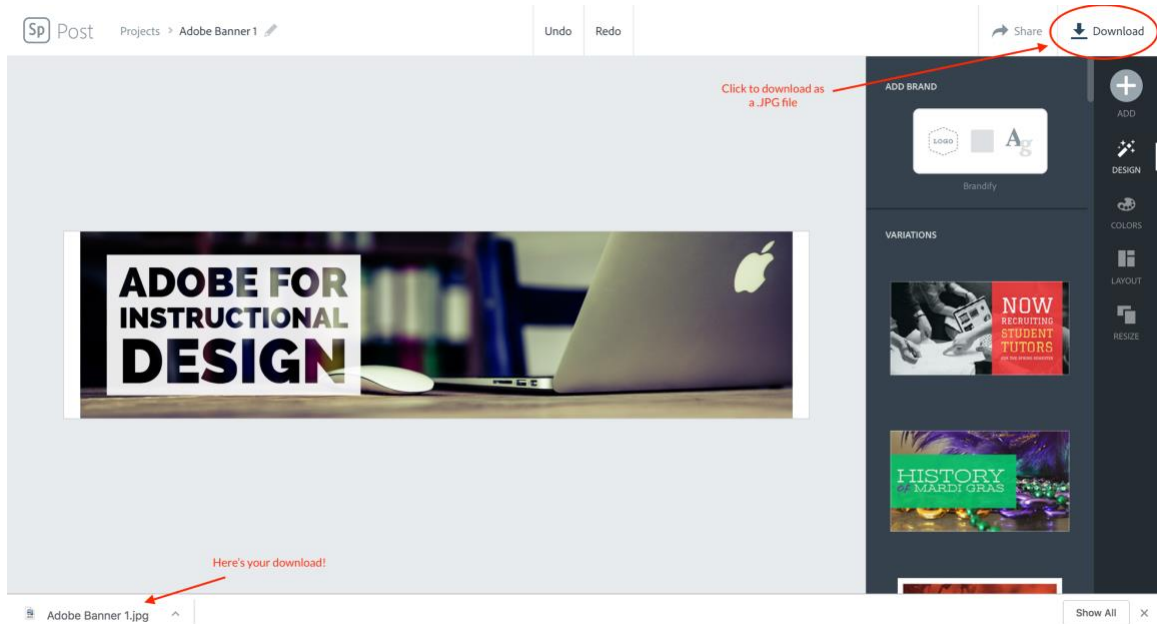

1. Now that we've finished our banner, the next step is to use it! You have a few options. First, you can click on the **Share** link in the top right-hand corner of your screen.

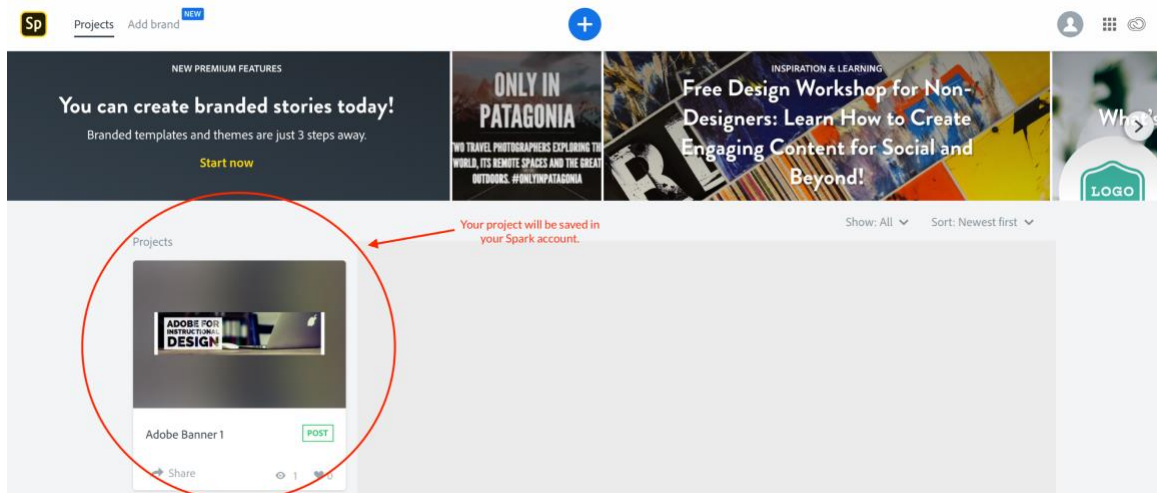

2. This will show you all the options you have for sharing your new project: you can share it through social media or email. The **classroom** button allows you to share it directly to Google Classroom. The **link** button will generate a specific link to your project that you can share with others.

3. If you prefer, you can also download your project. Click **Download**.

4. Your project will also be saved in your Spark account, so you can view it, edit it, and re-download or re-share it anytime you choose. This is what you will see when you login to your account:

That's it! Now that you know the basic steps to creating a graphic in Spark, you are ready to design banners or images for use in your courses.
